Recent Development in Pharmaceutical Analysis 2023 (RDPA 2023)

Description

RDPA is a very stimulating biennial meeting, which continues a long-standing tradition of excellent scientific events aimed at the many international and national scientists who work in the field of pharmaceutical analysis in all of its domains and multiple aspects.

The RDPA 2023 program will include plenary and keynote lectures, as well as oral, flash and poster communications. Presentations by young researchers working in this field will be given special attention. The most appealing and relevant research topics in (bio)pharmaceutical analysis, including advanced methodologies and innovative instrumentation assisting the drug discovery process, will be addressed, giving due attention to natural products, food and nutraceuticals, forensic science, to name a few.

Esteemed speakers include Serge Rudaz (Univ. of Geneva, Switzerland), Börje Sellergren (Malmö Univ., Sweden), Romà Tauler Ferré (IDÆA-CSIC, Spain), José Luis Capelo Martínez (Univ. of Lisbon, Portugal), Bezhan Chankvetadze (Univ. of Tbilisi, Georgia), Chiara Cordero (Univ. of Turin, Italy), Antonia García (Univ. San Pablo, Madrid, Spain), Laura Goracci (Univ. of Perugia, Italy), Clara Grosso (Polytechnic Institute of Porto, Portugal), Ilisz István (Univ. of Szeged, Hungary), Simone Nicolardi (Leiden Univ. Med. Center, Netherlands), Dan Stærk (Univ. of Copenhagen, Denmark), Myriam Taverna (Institut Galien Paris-Saclay, France).

Aims

Many opportunities to involve analytical scientists in fruitful research discussions will be provided.
